

Hot off the press! We just learned from the state that CMMI authorized funding for TCPi through August 2019! This is great news and we're excited for our practices to continue their journey.

This year, TCPi participants are off to a great start working to create individualized Value Propositions to enhance payer relationships.

And congratulations to one of our own practices, The PIC Place. The PIC Place in Montrose, involved in TCPi and SIM, will have the honor of attending and presenting at the CMS Quality Conference in Baltimore January 30, 2019. Their unique model of care, including their *Journey to Health* patient engagement tool, will demonstrate well intended outcomes of the initiatives. Coach and Quality Improvement Specialist, Kathryn Steele from CCA, will also be attending this national event in support of the practice.

**Have a question about TCPi?**  
**Ask Kathryn!**
