

Best Contaminated Land Photo

Good evening, ladies and gentlemen.

My name is Kerby Lofts the Project Engineer on the Goulburn Gasworks Remediation Project which is shown on the screen.

We'd like to thank Jemena for working with Enviropacific on this landmark project in the heart of Goulburn.

This spectacular image, captured via drone, depicts a longstanding tar well which was situated in the centre of the site - a remnant of the gasworks infrastructure.

Using additives, the Enviropacific project team made the liquid tar suitable for transport to our Victorian SOLVE facility for thermal treatment and full destruction.

Enviropacific would like to thank ALGA for the award and congratulate all the award winners tonight.

Thankyou,
