Enviropacific Project: Goulburn Gasworks Remediation

Client: Jemena Gas Networks (NSW)

Photographer: Marty O'Donnell | UAV Operator | Atmosphere Productions Pty Ltd

Enviropacific and Jemena are working together through a sustainable project partnership to deliver a successful gasworks remediation project in rural NSW. The Goulburn Gasworks Remediation, which adjoins the social and environmentally significant Mulwaree River has been a collaborative achievement.

This spectacular image, captured via drone, depicts a longstanding tar well which is situated in the centre of the site - a remnant of the defunct gasworks infrastructure. The Enviropacific project team performed solidification on the liquid tar using additives to make it spade-able prior to transport to our Victorian SOLVE facility for thermal treatment and destruction.
